Education

Deenbandhu Chhotu Ram University of Science and Technology (DCRUST) *Nov 2022 – Jun 2026*
B.Tech in Computer Science and Engineering **CGPA: 8.37 / 10**

Raj International School, Rewari *Jun 2021*
CBSE Class XII **94.4%**

Technical Skills

Languages	Python, JavaScript, TypeScript, C++, C, HTML5, CSS3
Frontend	React.js, Next.js, Functional Components, Hooks, Context API, Tailwind CSS, Responsive UI
Backend & APIs	Node.js, Express.js, REST APIs, JWT Authentication, Axios, Fetch API
Databases	MongoDB, ChromaDB, Vector Databases
AI / ML	LangChain, Ollama (Llama 3), RAG, Embeddings, Semantic Search, Prompt Engineering
Tools	Git, GitHub, VS Code, npm, Postman
CS Fundamentals	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Experience

L&T Technology Services (LTTS) *Jan 2026 – Apr 2026*
Developer Intern *Bengaluru, India*

- Engineered a **Retrieval-Augmented Generation (RAG)** pipeline for intelligent document querying and contextual response generation.
- Implemented **vector embedding** generation and semantic indexing workflows, improving retrieval efficiency and search relevance.
- Integrated **LLM inference** (Ollama + Llama 3) with a document retrieval system to deliver context-aware answers from unstructured data.
- Built a **Document Compliance Checker** module leveraging semantic similarity scoring against policy references.
- Worked with AI tooling including **LangChain**, **ChromaDB**, **sentence-transformers**, and local LLM deployment workflows.

Projects

weCure — AI-Powered Healthcare Navigator [Live]
React.js, Node.js, Express.js, MongoDB, JWT

- Developed a full-stack healthcare platform enabling **doctor–patient interaction** and appointment management.
- Integrated an AI-powered chatbot assistant and a **symptom-based disease prediction** workflow.
- Designed secure authentication and role-based authorization using **JWT access control**.
- Built RESTful APIs for appointment scheduling, user management, and healthcare data handling.
- Implemented **responsive UI** architecture for seamless usage across devices.

Local PDF AI Agent — Privacy-Focused RAG System
LangChain, Ollama, ChromaDB, Python

- Built a **local AI agent** capable of answering contextual questions from uploaded PDF documents without internet access.
- Developed **semantic retrieval pipelines** using sentence-transformer embeddings and FAISS/ChromaDB vector search.
- Optimized retrieval quality through strategic **document chunking** and contextual indexing strategies.
- Enabled **privacy-focused offline inference** using locally hosted LLMs via Ollama.

Alumni Connect Platform
React.js

- Built a networking platform connecting students with alumni for **mentorship and career guidance**.
- Developed reusable React components and responsive UIs with **efficient state management** and optimized rendering.

Achievements

- Solved **230+ DSA problems** across LeetCode and competitive coding platforms.
- Achieved **2★ rating on CodeChef** with a highest rating of **1410**.
- Strong problem-solving foundation in Arrays, Trees, Graphs, Dynamic Programming, and Hashing.

Certifications

Agentic AI Architect — IBM SkillsBuild & CSRBOX *Jul 2025 – Aug 2025*
